SUMMARRY

I'm a full-stack developer with experience in AI and machine learning. I work with Python, JavaScript, Django, Django Rest Framework and Flask , and I build front-end designs using HTML, CSS, and Tailwind CSS and React , NextJS. I use machine learning to solve tough problems and create smart solutions. I'm good at problem-solving, working well with teams, and making software that's user-friendly and high-quality.

TECHNICAL SKILLS

Django | Falsk	React | MERN STACK	Github | Git
Bootstrap | Tailwind CSS	Next JS	AL | ML
HTML | CSS | JavaScript	Docker	Django Rest API

SOFT SKILLS

Problem-Solving	Communication	Time Management
Collaboration	Adaptability	
Attention to Detail	Leadership	

Project

E-HealthCare Reccomendation System Web-devloped

- Role: Team Leader
- Tech Stack: Django, Django_rest_Framework, React, Full Authentication
- Description: Led a team to develop a web-based system that allows users to identify potential diseases based on symptoms, with full user authentication for secure access.

INoteBook Web-devloped

- Tech Stack: React, Tailwind CSS, Docker
- Description: Built a notebook app for efficient note storage and management. Users can create, edit, and delete notes with secure authentication. Dockerized the project .

Portfolio

- Developed a Portfolio as a Project and NextJS this Technolodgy use in the Portfolio. And Also I have Dockerizing it throught docker.
